

This training will help drivers recognize and anticipate hazardous driving situations through a realistic, risk-free situation. Various simulations include environmental factors such as adverse weather, collision avoidance practice, distracted driving, as well as various city and rural environments.

The DTS is housed in a mobile trailer which is brought to your location at no additional cost. Two participants are trained simultaneously in 60-minute increments with high resolution LED LCD monitors and a motion-based seat.

If you have any questions or wish to schedule the DTS, please contact Lori Sieverkropp at lsieverkropp@chooseclear.com.

Training Available for the Following Vehicles:

- Pickup Truck
- Passenger Vehicle
- Buses
